DETAILED ACTION

The indicated allowability of claims 1-11, 15-21 and 30-32 is withdrawn in view of the newly discovered reference(s) to US Patent 6,261,801. Rejections based on the newly cited reference(s) follow.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Apo-2DcR Polypeptides.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 1-11, 15-21 and 30-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Patent 6,261,801 (Wei et al.).

US Patent 6,261,801 teaches "TRID" or "tumor necrosis factor receptor 5" ("TNFR-5") with the amino acid sequence of SEQ ID NO:2, which has the same sequence as the sequence of SEQ ID NO:1 of the instant application. Also taught (col. 1, lines 10-16) is the ability of TRID to bind TRAIL (also known as Apo-2 ligand, col. 3, lines 4-12). Vectors and host cells, including E. coli, yeast and CHO cells, comprising or expressing TRID or at least the extracellular domain thereof are taught in col. 14, line 27-36, and col. 33, line 30- col. 40, line 26. Chimeric proteins including those comprising an IgG sequence are taught in col. 21, lines 62- col. 22, line 10. Also

Art Unit: 1646

taught are chimeric proteins comprising an epitope tag of hemagglutinin fragment (HA) to allow easy detection and recovery of the recombinantly produced protein with an antibody that recognizes the HA epitope (col. 37, line 55- col. 38, line 6).

Term Usage

It is noted that the art also refers to Apo-2DcR as TR5, TNFR-5, TRID, LIT, TRAIL-BP and DcR1.

Conclusion

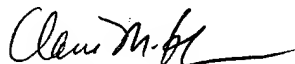

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Claire M. Kaufman, whose telephone number is (703) 305-5791. Dr. Kaufman can generally be reached Monday through Thursday from 8:30AM to 12:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler, can be reached at (703) 308-6564.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

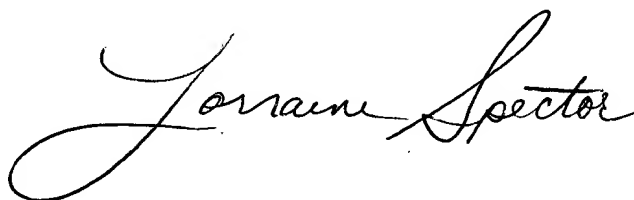

Official papers filed by fax should be directed to (703) 308-4242. Faxed draft or informal communications with the examiner should be directed to (703) 308-0294. NOTE: If applicant *does* submit a paper by fax, the original signed copy should be retained by the applicant or applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED so as to avoid the processing of duplicate papers in the Office. Please advise the examiner at the telephone number above before facsimile transmission.
